

www.onesteprecycling.com

By leveraging the latest technologies in shredding, cleaning, extrusion and continuous melt filtration, eFACTOR3 offers a total **OneStep** Solution for the plastic, plastic recycling and compounding industries.

SHREDDING

High quality, reliable, efficient and robust, Weima shredders are unique in design and performance and far more advanced than the conventional machines available today.

DRY CLEANING

A modern and extremely economical alternative or an optimal supplement to conventional wet cleaning plants, the MAS DRD system's special design allows it to be used in a wide range of applications, saving energy, eliminating waste water streams and reducing the cost of recycling significantly.

EXTRUSION

The key element of this integrated recycling and compounding system, the MAS extruder combines the familiar, superior, plastification and homogenization of a parallel twin screw extruder with the specific advantages of the conical screw design.

CONTINUOUS MELT FILTRATION

A vital part of the OneStep process, MAS CDF filtration systems continuously separate contaminants from the melt stream, eliminating the need for manual labor to frequently change screens.
